Sprint:	SPRINT 1

Description

Objective

Conduct formal stakeholder reviews, architectural demonstrations, and deliverable sign-offs for the Local RAG Chatbot prototype with the Senior Analyst and Operational Lead.

Stakeholder Engagement & Iterative Review Timeline

- Initial Stakeholder Presentation (Approx. 2 Months Ago):** Convened initial briefing with the Senior Analyst and Team Operational Lead to present the proof-of-concept architecture, offline security constraints, and compliance mappings (K1, P2, P3).
- Follow-up Meeting 1 (Refinement & Feedback):** Addressed stakeholder feedback regarding user access controls, interface simplicity via Streamlit, and the requirement for explicit document and section-level citations to eliminate hallucinations.
- Follow-up Meeting 2 (UAT & Final Review):** To demonstrate the fully operational local pipeline processing dummy SOPs (SOP-001 and SOP-002) via Ollama and ChromaDB, confirming zero external data leakage and verifying full adherence to governance policies.

Implementation Checklist

- [x] Schedule and conduct initial stakeholder walkthrough with Senior Analyst and Operational Lead
- [x] Incorporate feedback on citation clarity and local security boundaries during secondary review meetings
- [x] Perform final user acceptance testing (UAT) demo showcasing authentication, retrieval accuracy, and zero-cloud execution
- [x] Obtain formal sign-off and approval on project deliverables from operational stakeholders

Comments

Comment by Amal S [10/Aug/26]

Status Update: Completed. Successfully engaged the Senior Analyst and Operational Lead across a structured review cycle starting two months prior, including two iterative alignment meetings to refine citation formatting and security constraints, culminating in formal project sign-off and deliverable approval.
